## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims 1-6 and 10-14 are drawn to an invention nonelected without traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Drawings***

2. The replacement drawings were received on 01/30/06. These drawings are accepted.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Brock et al. (5,362,584) (hereinafter Brock).

As to claim 7, Brock discloses a method of defining contacts on an IC device using incident wave. The method includes the steps of providing an IC device substrate 15a ((fig. 1A), a first plate (mask) 10e, 10f (fig. 5A) of material transparent (col. 1, line 58) and a layer of phase shifting material 12e, 16f, 46 (fig. 6B; fig. 4B) having defined therethrough a regular polygon-shaped (fig. 4A) an etch window 40 (fig. 4A; col. 2, line 46; col. 4, lines 33-34; col.5, lines 14-19); and directing the incident wave (col. 1, lines 25-29) at the substrate through the layer of phase shift 12e, 16f material and the first plate 10e, 10f.

As to claims 8-9, Brock teaches that the layer 16f (fig. 6B) causes a 180 degrees phase shift (col. 1, line 27) of the incident wave (col. 1, lines 25-28), thereby partially absorbs the incident wave.

### *Response to Arguments*

5. Applicant's arguments filed 01/30/06 have been fully considered but they are not persuasive.

In the remarks, applicants argue the rejection of claims 7-9 under 35 USC 102(b). In particular, in claim 7 applicants contend that Brock does not teach a “regular polygon-shaped etch window with at least six sides”. On the contrary, Brock does disclose in figure 4A, a “regular polygon-shaped” etch window with at least six sides. Applicants’ claim 7 recites limitations that are still too broad. Thus, Brock meets each and every limitation in the present application’s claims 7-9.

### **Conclusion**

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
